

collected three expended Taser paper tabs from the kitchen floor and I seized a DMV Certificate of Medical Eligibility form from a bulletin board in Hanson's bedroom. Detective Young gave the tabs to me and I placed them in Evidence. We cleared from the apartment and I locked the door behind us, returning the apartment key to the landlord the next day.

I made copies of the Unisom packages, receipts for same, and copies of the print-outs that Officer Wesel had made from Hanson's computer screen. The receipts and pill boxes were entered into Evidence.

The next day, I attend Hanson's autopsy conducted by State Deputy Medical Examiner Dr. James Olson at the Oregon Station Police headquarters in Central Point. Dr. Olson surgically removed the remaining Taser probe, which Detective Young collected and gave to me. This item was also entered into Evidence. During the autopsy, Dr. Olson opened the stomach and I observed and photographed a bluish liquid within that was consistent in color with the blue liquid stains on the counter and floor in Hanson's apartment (see Officer Wesel's report).

Dr. Olson eliminated the Taser's effect as a cause of Hanson's death. He did not find anything unusual during the autopsy and tentatively concluded, pending a toxicology report, that Hanson's death was due to sudden cardiac arrest due to an overdose of sleeping medication combined with alcohol.

On January 26th, I turned the Taser unit, holster, and spare cartridges over to MPD Lieutenant Tim George so that it could be tested by experts within their agency. Included also in my report is a copy of Officer Schuster's Taser qualification record.

ATTACHMENTS

CAD run sheet
DMV medical eligibility form
Print-outs from Hanson's computer screen
Copy of Unisom package
Copies of relevant receipts
Copy of Taser qualification record for Officer Schuster Property Control Forms

EVIDENCE
